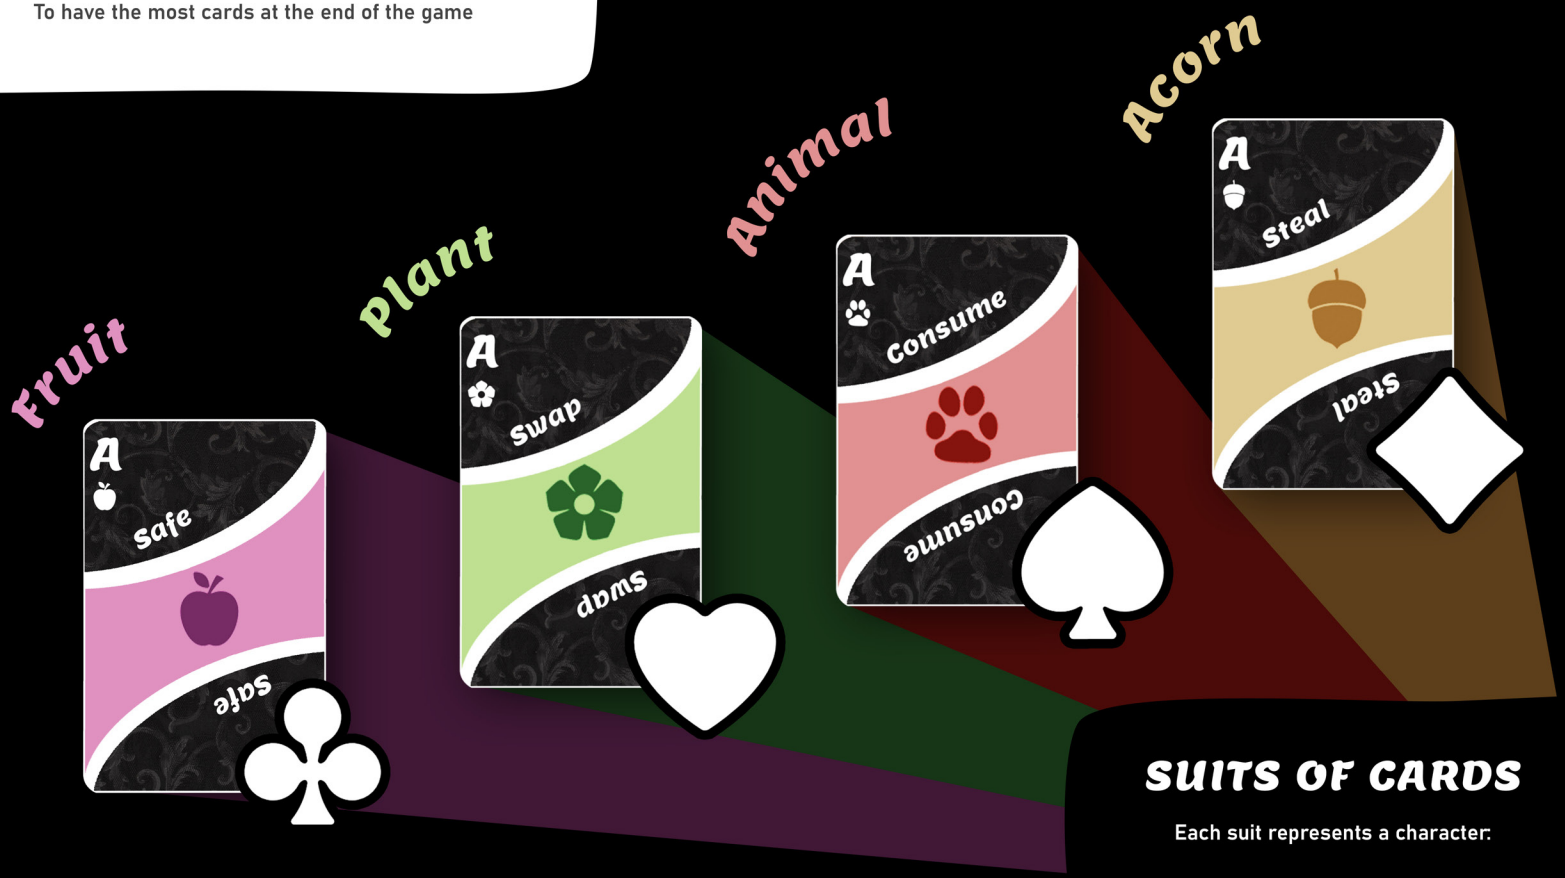
ROOT FRUIT

RULES

GOAL OF THE GAME

To have the most cards at the end of the game



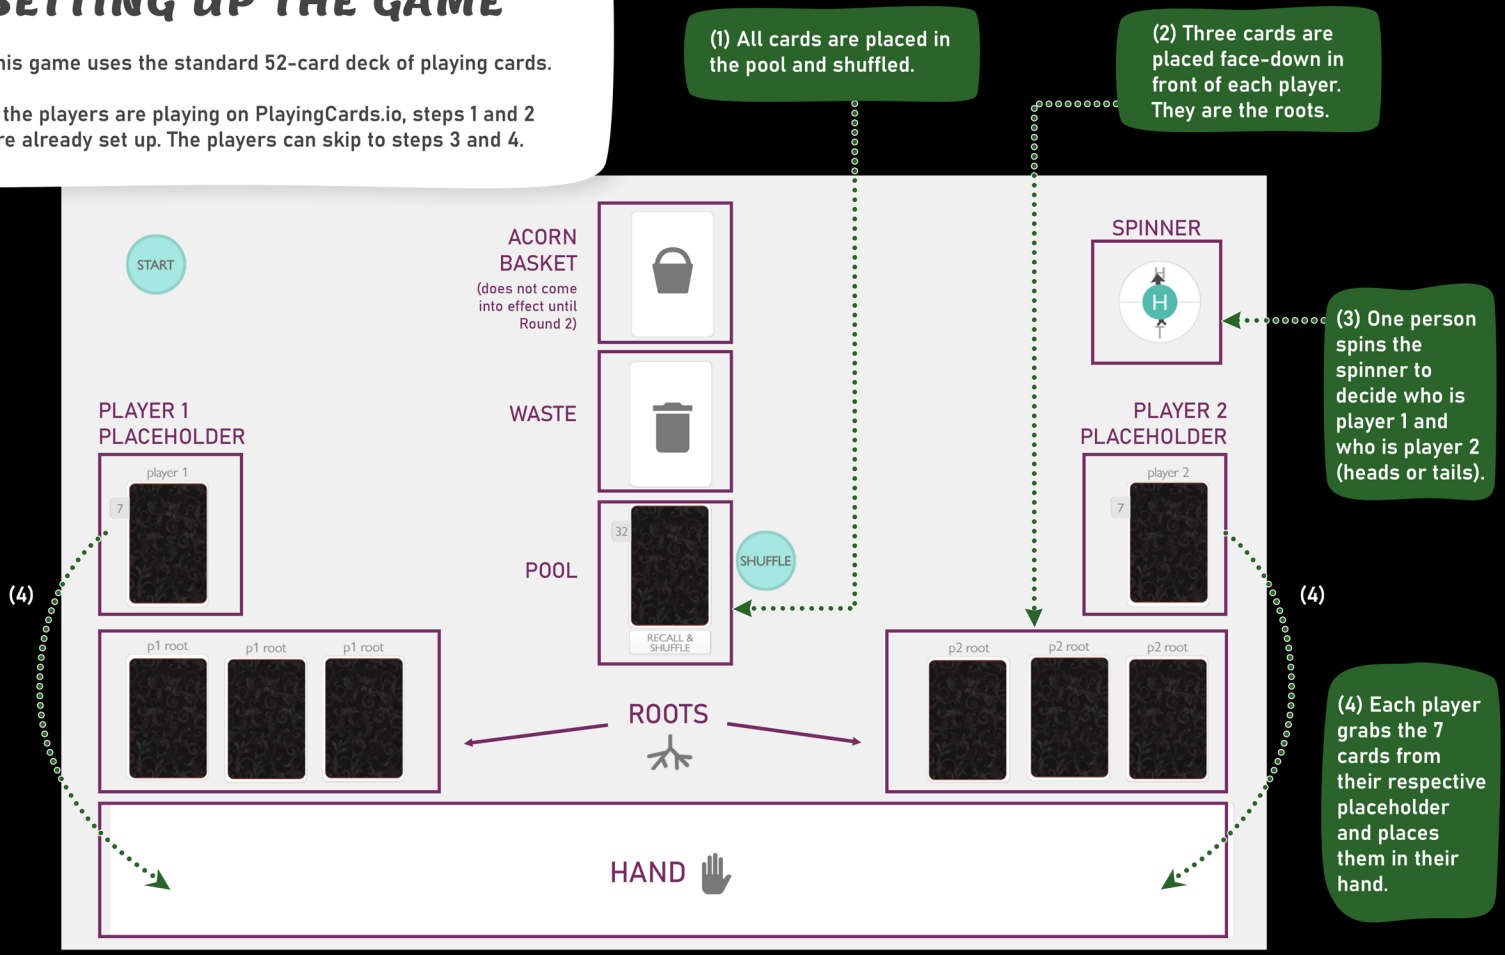
SUITS OF CARDS

Each suit represents a character:

SETTING UP THE GAME

This game uses the standard 52-card deck of playing cards.

If the players are playing on PlayingCards.io, steps 1 and 2 are already set up. The players can skip to steps 3 and 4.



PLAYING THE GAME

The players take turns picking a card from the pool and reveal it to all the players. Based on the suit of card picked, the player must perform an action:

IF YOU PICK A FRUIT

Hooray! You just acquired a juicy delectable fruit.
Keep that precious fruit in your hand.

IF YOU PICK AN ANIMAL

Oh no! The animal eats one of your scrumptious fruits.
Place a fruit in the waste.
Keep the animal in your hand.

If you don't have a fruit, the animal grabs one of your plants and flees with it.
Place the animal and a plant in the waste.

If you neither have a fruit nor plant to feed the animal, place the animal in the waste.

IF YOU PICK A PLANT

Place the plant in your hand. Next, you have 2 options

SWAP

Take one card from your roots and place it in the placeholder.
Take one card** from your hand and place it face-down in the now empty slot of your root.
Flip the card in the placeholder and perform the action based on its suit (see quadrants).

PLACE H.DER

flip PLACE H.DER + do action

OR

REPLENISH

If there are empty slots in the roots, you can choose to place a card from your hand** in an empty slot instead of swapping.

**NOTE: You cannot put a plant card in the roots.

IF YOU PICK AN ACORN

Ah, the acorn... aka the ultimate tool of distraction while you snatch something away from your opponent...

Steal a card from your opponent's roots and reveal the card to both players. Put your acorn in the waste.

If the card you stole is a:

or or

Perform the action based on the suit of the card (see other quadrants).

Take a card from your own root and perform the action based on the suit of card. Put the acorn in the waste.

ROOTS

If the player picks an acorn but their opponent has no cards in their roots to steal from:

The player picks a card from the pool instead.

If the player has no more cards in their roots:

At the player's next turn, the player needs to choose three of the cards in their hands to fill the three spots in the roots. The player does not get to pick a card from the pool during that turn.

WHEN THERE ARE NO MORE CARDS LEFT IN THE POOL

THIS MARKS THE END OF ROUND 1.

1. To set up Round 2 and all future rounds, transfer all the cards inside the waste to the pool. Do not touch the Acorn Basket.

2. Shuffle the cards in the pool by clicking the "Shuffle" button (not the "Recall & Shuffle" button).

3. Keep playing with the same rules as Round 1, except this time, discard the acorns in the Acorn Basket instead of the waste every time you pick up an acorn.

WHEN THERE ARE NO MORE CARDS IN BOTH THE POOL AND WASTE, THE GAME IS OVER:

1. The players must flip over all the cards in their respective roots.
   - All plant and fruit cards from the roots go into the player's hand.

   - All acorn cards from the roots go in the Acorn Basket.

   - For each animal card in the roots: perform the action (see: "If you pick an animal").

2. The players must place all the cards from their hands in their respective placeholder.

The player with the most cards is the Champion of the Trees!

Setup for the next game:
Click the "Recall & Shuffle" button, then click "Start".
